To Whom It May Concern,

I would like to recommend PhonesUSA for the excellent automated phone system and service that they have provided for my medical office. Last year, I started a medical practice with another physician and we required a phone system that could handle a high volume of patient, pharmacy and physician calls and provide a top of the line after hours paging system. PhonesUSA provided a system that has more than accomplished these goals.

In addition, Anthony Loder and Craig Nardone have always been available and willing to answer all of our questions. I have been extremely satisfied with Mr. Loder and Mr. Nardone's commitment to providing top quality service. Our current phone system is superior to my previous system which included an after-hours paging service and a non-automated system.

For these reasons, I can recommend PhonesUSA without reservation and am grateful for the excellent products and services that they have provided for my office.

Sincerely,

Cathy Weiss Green, MD
