

THE IDEAL CHOICE

Telecommunications Financing

Over two billion dollars of telecommunications equipment is leased by US companies each year, because leasing offers tax deductions, flexibility, simple upgrading, superior asset management, cash flow consistency, and quick processing.

Telecommunications upgrades and add-ons are included in all lease agreements, allowing for easy migration to state of the art equipment.

Terms start at 24 months, with 36, 48, and 60-month leases options. Choose from a \$1.00 purchase option to a 10% purchase option. Or you can take advantage of FirstLease's exclusive "Six at \$99" program. Pay nominal payments of \$99 for the first six months of your lease, followed by affordable fixed payments for the remaining 54 payments.

Leasing allows companies to lease/purchase a variety of equipment, including the service plans accompanying the purchase. The following are examples of eligible equipment, but other items will be considered:

- VoIP
- Cabling
- Installation
- Fax & Copiers
- Data Networks
- Voice Processing
- Security Cameras
- Predictive Dialers
- Telephone Systems
- Video Conferencing
- Extended Warranties

PhonesUSA has provided telecommunications sales, installation, and service since 1982. FirstLease has offered affordable, high-end equipment leasing since 2001. Our flexible program allows flexible leasing plans that fit any budget. Choosing to finance is a smart business decision; choosing **PhonesUSA** and FirstLease is even better.
